AGENDA

Overview:

This 1 day training program will provide hands on learning experience for I&E maintenance, process engineers.

The hands-on exercises will use running demos. There is a maximum of 8 students per class.

Topics:

- Theory of Operation
- Field Examples: Proper Installation and Applications
- Diagnostics
- Troubleshooting

Purchase order or payment is required at the time of enrolment. PO, cheques & credit cards acceptable and made payable to: **Lakeside Process Controls Ltd.**

Cancellations: If your plans or budgets change, you may cancel your reservation up to 14 calendar days prior to the start of the course without incurring a cancellation charge. Limited enrolment makes it necessary to charge 50% of the full tuition for cancellations received during the 14 days prior to the start of the course, and full tuition for failure to attend without cancelling. Substitutions are accepted until the first day of class.

** For block discount of 4+ people from the same organization, please call at the number mentioned in the registration link.
